- * Matching Colour Button
- * Matching Ribbed Collar & Cuffs
- * Available in 15 colours

Premium Cotton

- * Matching Rippled Collar
- * Available in 18 Colours

T-Shirt / Printing Method

Embroidery

Embroidered designs retain their quality for several years, over multiple washes.

Silkscreen

The silkscreen printed T-Shirt is the high visibility you will see as well as bright, vivid colors and images printed on the shirt.

Sublimation

Dye Sublimation is a computer-aided printing process that turns ink into a gaseous state for printing. The gaseous ink is absorbed into fabrics, the dye sublimation process works best with nylons and polyester materials.

HD Print

DTF stands for Direct To Film. This technique involves printing your design directly onto a film and then transferring it to a T-shirt made of cotton, polyester, or their blends, regardless of their colour, as it can work with white ink.
